## EDS 1700 Series **Pressure Switch with Display**

### Description

The EDS 1700, with its integrated pressure measuring cell, a 4-digit display and the 4 switching outputs, offers the user all the advantages of a modern electronic pressure switch.

4 switching points and reset points can be adjusted very simply and independently of each other using the keypad.

For optimum incorporation into monitoring systems (e.g. with PLC), an analog output (4 to 20 mA or 0 to 10 V) is also available.

The main applications of the EDS 1700 are in hydraulics and pneumatics. The instrument is ideal for use where frequent switching cycles (several million) require permanent switching point accuracy for simple and precise adjustment

## Special Features

- Integrated pressure sensor with strain gauge on stainless steel membrane
- Accuracy 0.25% or 0.5% BFSL •
- 4-digit digital display .
- User-friendly key programming
- 4 limit relays, switching points and reset points can be adjusted independently
- Analog output signal selectable
- Many useful additional functions
- Optional mounting position (pressure connection on the top/bottom, keypad and display can be turned through 180°)
- Can be set to display values in any unit of measurement e.g.: kN, kg, psi, ...

## Approvals

CE mark is a mandatory conformity mark on many products placed on the single market in the European Economic Area
