Instructions for instrument selection in the catalogue

So that the customer gets the best equipment solution according to his requirements, we recommend this simple procedure using the following pages:

- Define the dimension of the fitting or interface (e.g. thread G2", DIN-flange DN25/PN16, etc.)
- Determine the electrical connection (e.g. terminal box, cable entry, plug, etc.)
- Find out the operating conditions, min. and max. operating pressure, temperature and specific gravity of the media at the max. operating temperature.
- With the size of the fitting and material of the instrument, a guide specification can be selected on pages 86 to 92.
- The full and final specification can now be generated by reference to the „type key“ on pages 94 to 96.
- With the type description and the technical operating conditions a price quotation can be made or the instrument can be ordered.
- Specification of the requested approval.

Magnetic Float Switches horizontally mounted 1003-h

Description and function

Magnetic float switches operate with inert gas contacts (reed switches). These reed contacts are activated by the magnetic field of a permanent magnet in the float, without wear and tear or mechanical contact. The contact function can be change over (standard) or normally open. The only moving part of a magnetic float switch is the floatsystem.

Technical advantages

- compact construction
- only few mechanical components
- EExia, EExd and Ex/D certified
- design according to GL/BV/RINA
- available in stainless steel V4A quality, titanium, alloy, PP, PVC, PVDF and E-CTFE coated
- connection flange according to DIN and ANSI, with thread or square flange 80/80 or 92/92

Magnetic Float Switches horizontally mounted 1003-h

Certificates / Approvals

Certificates

SCHWEIZERISCHER VEREIN FÜR QUALITÄTS- UND MANAGEMENTSYSTEME

Certified according to ISO 9000 rev. 2000

SWISS TECHNICAL SERVICES AG

Approval as production factory, welding examination and procedure qualification incl. restamping certificate for the production of pressure tanks according to SVTI-regulation 501, 201

Approvals

TECHNISCHER ÜBERWACHUNGSVEREIN DEUTSCHLAND (PED)

Approval as production factory for manufacture of pressure tanks according to AD HP 0, PED Pressure Equipment Directive 97/23/EG

SOCIETE NATIONALE DE CERTIFICATION ET D'HOMOLOGATION (ATEX)

Approval for the production of Magnetic Float Switches horizontally mounted according to EU-Directive 94/9/EG

GERMANISCHER LLOYD (Building of ships)

Approval for the production of Magnetic Float Switches horizontally mounted according to GL-regulations

BUREAU VERITAS (Building of ships)

Approval for the production of Magnetic Float Switches horizontally mounted according to BV-regulations

REGISTRO ITALIANO NAVALE (Building of ships)

Approval for the production of Magnetic Float Switches horizontally mounted according to RINA-regulations

Magnetic Float Switches horizontally mounted 1003-h

Approvals

As an innovative manufacturer of instruments for level control, we can offer to our customers systems according to different directives. The types of approval, applications and limits of use can be taken from the following specifications.

Approvals

Ex

A large number of magnetic float switches horizontally mounted from our standard range, or to customer requests, can be built according to the EU-Directive 94/9/EG with the protection types EEx ia IIC T3 to T6, EExd T4 to T6 and dust Ex/D. By the combination of the instruments with the type key, the catalogue shows with the Ex hexagonal logo which components can be used for Ex-instruments.

Temperature of media:

EEx ia-instruments

T3	180 °C
T4	130 °C
T5	95 °C
T6	80 °C

EEx d-instruments

T4	120 °C
T5	95 °C
T6	80 °C

PED

Under the Pressure Equipment Directive 97/23/EG, any pressure vessel or instrument used within a pressurised system at 0,5 bar or above, has to conform to various categories. Depending on the design data or customer needs, manufacture of instruments is to either of the categories below.

Category II

Module	A1
--------	----

Category IV

Module	B+D
--------	-----

GL / BV / RINA

Magnetic Float Switches horizontally mounted for use in shipping can be manufactured to GL (Germanischer Lloyd), BV (Bureau Veritas) or RINA (Registro Italiano Navale) standards in large variety of design possibilities complete with controllers.
